It's Hot Out – Must Be Time to Think About Heating Products!

Furnace Controls are seasonal, but are still installed year-round.

Seems like we just put the snow shovels and ice melt away. Summer heat and humidity is full-bore on most of the US, so delivering replacement products and handling service calls quickly is a top priority for all of us.

You may think of furnace control modules as a heating/winter control item, but keep in mind that replacement can happen any time of the year. Not only is it important to keep replacement furnace controls on your trucks, you should stock universal replacements – especially during the heating season.

Why Universals?

A Universal product will replace most modules and the best Universal will save time on the job and make you more profitable. And the best Universal Kits are from White-Rodgers.

- 3 SKUs will replace virtually all integrated furnace controls – single or two-stage, Silicon Carbide or Nitride ignitors, and White-Rodgers or competitive modules.
- No need to take time to run to a wholesaler for a dedicated module or ignitor (that may have to be ordered) – White-Rodgers Universal Kits include everything needed for a quick and accurate replacement.
- All Universal Kits are not equal. Kits from White-Rodgers are easy to install and save installation time – just what you demand from the expert in ignition controls.

Replacement Gas Valves

It's easy to think of Gas Valves as a commodity item, but at White-Rodgers, it's the first thing we think about in the morning and the last thing at night. Whether safety, quality and reliability or ease of installation is your concern, you can rest easy knowing that **White-Rodgers has manufactured and shipped well over 150,000,000 gas valves for residential applications in North America.** Nobody knows gas valves better than we do.

We offer direct replacements and four Universal models that will cover most every standard application. See our Visor Card or Website for the latest replacement information.
