When it's time to light – think White-Rodgers

We make it easy for you to have the right ignitor for your application.

It only makes sense that the leader in direct replacement and universal replacement gas valves and ignition modules would be the source for ignitors too.

Direct Replacement

White-Rodgers has a complete offering of direct replacement Silicon Carbide Ignitors (**767A-xxx series**) covering virtually all OEM furnace applications.

One of the Carbide ignitors to check out is a **mini-ignitor 767A-378** that will replace a Goodman mini-ignitor, like-for-like. The 767A-378 includes a special bracket to replace larger (previous Goodman version) ignitors too.

Easy, Accurate Replacement

White-Rodgers also makes it easier to verify that you have the correct replacement ignitor in your hand, without opening up the box. White-Rodgers is now shipping single pack ignitors in boxes with full labels that include a full-size, dimensioned drawing of the ignitor. This makes matching up the old ignitor to the new ignitor a breeze – and you don't have to open the box!

Nitride Upgrade Kit

Sometimes you just can't get the ignitor you need or it's late on a Sunday and you are on a no-heat service call. The answer is our **21D64-2 Universal Nitride Replacement Kit** that will quickly and easily convert a silicon carbide ignition application to Nitride ignition. The 21D64-2 Kit includes the Nitride ignitor with extra long lead wires, multiple universal mounting brackets, ceramic wire nuts and easy to follow instructions. Be sure to keep a couple of these universal kits on your truck for no-heat emergencies.
